EXPERIENCE

Frontend Developer at ForeFront

Feb 2021 - Current | Fair Haven, New Jersey

- Implement scalable and configurable web solutions for client requirements in Salesforce, within the B2B and B2C Commerce domain.
- Refactor and maintain code currency for legacy compatibility with Salesforce Classic and Salesforce's evolving features like the Lightning Web Component framework.

Web Developer at Knowt

Aug 2019 - Apr 2021 | Lewes, Delaware | Remote

- Designed dynamic quiz components and styled UI elements using CSS, JavaScript, and Material-UI.
- Developed platform features like PDF reader with zoom and scrollable pagination in React-PDF and an efficient notification system through React's Context API.

Web Developer at javierlarosa.design (moved to <https://javierdesign-e154d.web.app/projects>)

Jul 2020 - Dec 2020 | Parsippany, New Jersey

- Launched a responsive UX Design portfolio that incorporated design trends while meeting client specifications and informing design strategies.
- Streamlined client-developer workflow by designing an organized and comprehensive code base, resulting in the client securing prompt employment.

Web Developer at JordanGross Photography

Jul 2020 - Dec 2020 | Parsippany, New Jersey

- Collaborated with client to create Figma-based mockups, ensuring alignment with their vision and contemporary design trends.
- Developed a React-based web solution featuring an appointment scheduling system with EmailJS for notifications and Google Firebase's Realtime Database for date management.
- Achieved performance enhancements through refactoring and image compression.
