EMPLOYMENT

ForeFront · *Frontend Developer* · Fair Haven, New Jersey Feb. 2021 - Present

- Serve as a member of the B2B commerce team, implementing scalable web solutions for client requirements using Salesforce
- Refactor and reimplement Salesforce Classic features and legacy code into Salesforce's new Lightning Web Component framework
- Innovate custom code solutions for features not feasible in Salesforce, like coupons, quote-to-cart processes, and guest user checkout
- Utilize JIRA to maintain an efficient Agile workflow, and provide concise communication to team members and clients
- Actively contribute to team standards and engage in collaborative professional culture with technical and non-technical counterparts

javierlarosa.design · *Web Developer* Dec. 2020 - Apr. 2021

- Developed a modern web application adhering to the client's design requirements, and provided design solutions for uncovered cases
- Planned a scalable code base structure for future client-requested updates
- Corresponded and synchronized frequently with client to ensure the most efficient workflow and feasibility within time frame
- Achieved the desired results as it aided the client in successfully gaining employment

Knowt · *Software Developer - Frontend* · Lewes, Delaware Aug. 2019 - Apr. 2021

- Implemented component solutions for features like question types for quizzes and answer validation algorithms
- Styled UI and interactive dashboards to fit mockups and user flow using CSS, Javascript, and Material-UI
- Implemented a PDF reader with zooming abilities and scrollable pagination with React-PDF
- Developed an notification system to communicate to users, using React's Context API

jordangrossphotography.com · *Web Developer* July 2020 - Dec. 2020

- Collaborated with client to design mockups per client vision using Figma
- Designed and developed a web solution to fit mockup and provide necessary functions using React
- Implemented a booking system where users can book photo sessions with the photographer through a form and email notifications using EmailJS
- Integrated Google Firebase's Realtime Database to store and read booked dates
- Optimized and improve performance through code refactoring and image compression with GIMP

PROJECTS

Portfolio Website Jan. 2020 - June 2020

A complete recreation of my initial portfolio website with newer designs and technologies.

Capstone Project Sept. 2019 - Dec. 2019

A project for a start-up called Thought4Thought where I served as a Frontend Developer, and developed the layouts used in the web application.
